

IMPORTANT NOTICE

On February 1, 2007 pay.gov (the Internet Credit Card processing facility for CM/ECF) will implement a new security procedure. The Security Code field on the On-Line Payment screen will become MANDATORY. This field had previously been optional.

The Security Code, is a three or four digit number (depending on the card brand). The On-Line Payment screen contains a special hyperlink titled "[Help finding your security code](#)" that can be clicked to pop-up a window which displays where security code information can be found on various cards.

This change is designed to make On-Line payment processing more secure.
